

**Amna**

Fast, Efficient, One Touch

# Background

Uncertainty of Working  
Environment Conditions

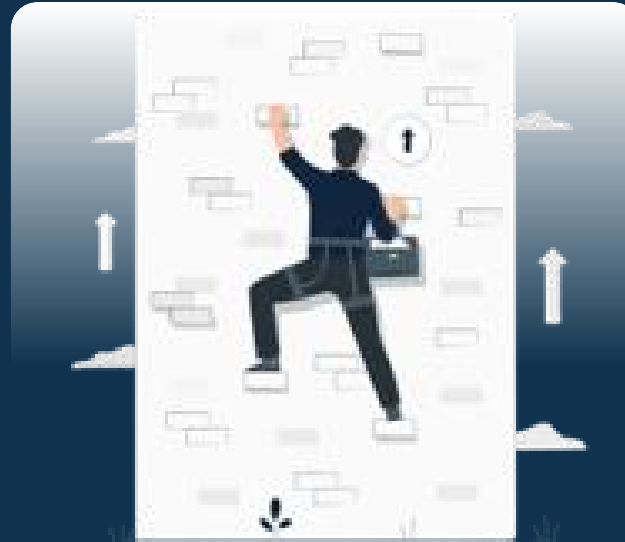

Unaligned Objectives towards  
Regulatory Compliance

Difficulties in  
Crisis Handling and Quick Response

# Why Amna?

Increase compliance with occupational safety and health standards.

Reduces the risk of accidents and illnesses that can affect productivity

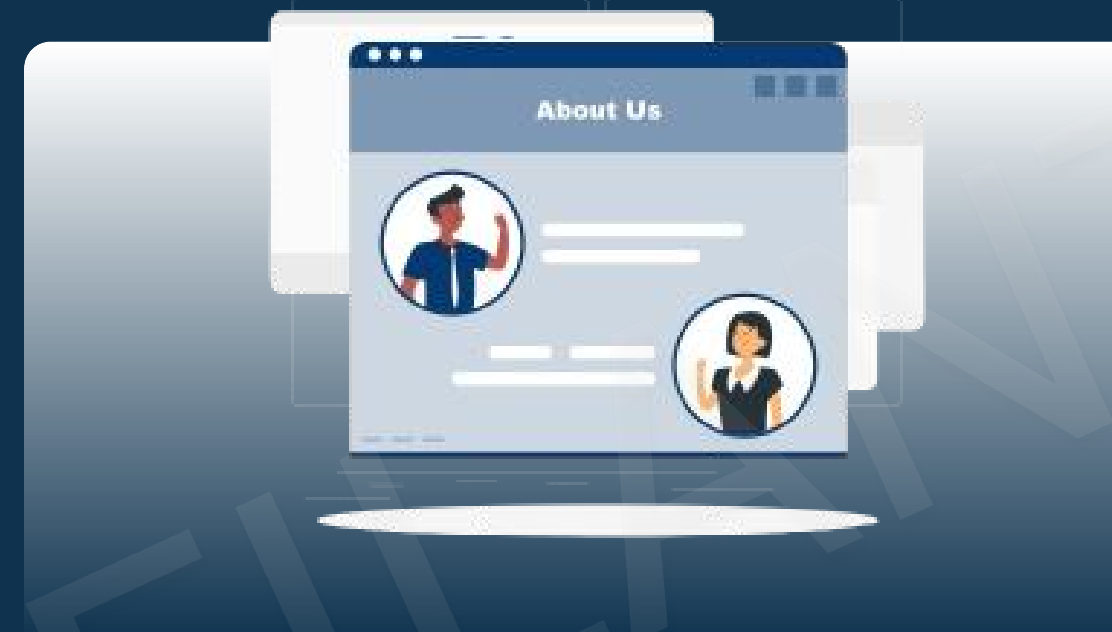

Ensure the continuity of the company's operations.

## Finding Report

Finding Report is the most important feature of the **Amna** application. In the Finding Report menu, you can create a report on findings that are potentially dangerous or threatening

## Forum

The forum feature is a virtual space where members of an organization can communicate, share information and discuss various aspects related to health, safety and the work environment.

## News

The News feature functions as a source of up-to-date and relevant information regarding health, safety and environmental issues in a company or industry context as well as regarding the latest sports.

# Flow App

## 1. Report Finding

Users report finding issues through the portal. Provide details such as location and description.

## 2. Do the action

Assigned parties investigate and plan actions. Implement corrective measures.

## 3. Approval HSE Team:

HSE team reviews the actions taken. Grants approval or provides feedback.

## 4. Reports

Approved findings and actions are documented. Reports are generated for analysis and communication.

# Benefit

Not using Amna

## High Risk of Accidents:

Without effective safety controls, the risk of accidents and life-threatening incidents can increase significantly.

## Regulatory Violations:

Failure to use **Amna** may result in regulatory breaches, potentially resulting in significant legal sanctions and fines.

## Employee Dissatisfaction:

An unsafe work environment can create dissatisfaction among employees, affecting their morale and performance.

Using Amna

## Employee Safety:

Ensures the safety and health of employees, reduces the risk of accidents, and prevents work-related illnesses.

## Regulatory Compliance:

Ensure the company comply all applicable occupational safety and health standards and regulations.

## Increased Productivity:

By reducing accidents and absenteeism caused by injury or illness, **Amna** can increase overall productivity.

# Potential Industry

Office

Manufacture

Health Care

Contruction

Mining

Kitchen
